

RCO Monitoring Tool

1. Opioid State Targeted Response-STR BARC (FL SOR Guidance 1.7.21 (12)) The BARC-10 is a strength-based measure that is completed via self-report to assess the level of broader personal, social, physical, and professional resources in an individual's environment that are used to initiate and sustain recovery, including structural supports such as a recovery-supportive living space and community relationships. The frequency of completing the Recovery Capital Assessment is every 60 and 90 days utilizing the Recovery Data Platform.
2. Opioid State Targeted Response-STR Data (FL SOR Guidance 1.7.21 (12)) GPRA DATA: The Government Performance and Results Modernization Act of 2010 (GPRA) is a federal mandate which requires all SAMHSA grantees to collect and report performance data using approved measurement tools. Providers of treatment and recovery support services (which are underlined in the Service Array section) will be required to collect data at five data collection points (baseline, 6 months post-intake, discharge, 3-months post discharge, and 6-months post-discharge) using the CSAT GPRA. The target completion rate is 100%; meaning programs must attempt to follow-up with all individuals. However, SAMHSA expects the state to achieve a minimum 6-months post-intake follow-up rate of completion of 80%. Any interview that is not conducted via face-to-face or virtual interview, will not count towards compliance. (NOTE: GPRA not necessary when service(s) is not applicable [e.g. outreach events] and/or individual has open GPRA elsewhere.)
3. Opioid State Targeted Response-STR Implnt (FL SOR Guidance 1.7.21 (12)) Services must be submitted to FASAMS by the 18th of each month.
4. Opioid State Targeted Response-STR Implnt (FL SOR Guidance 1.7.21 (12)) These organizations provide recovery-focused activities. There is evidence that the RCOs is providing at least one or more of the following: recovery-focused community education, outreach, and peer-based recovery support services.
5. Opioid State Targeted Response-STR Implnt (FL SOR Guidance 1.7.21 (12)) Recovery communities will work closely with community treatment providers and other stakeholders to promote harm reduction and provide recovery support services.
6. Opioid State Targeted Response-STR RDP (FL SOR Guidance 1.7.21 (12)) RCOs receiving one of the grant funded RDP licenses must enter data into RDP by the 18th of each month.
7. Opioid State Targeted Response-STR RecCap (FL SOR Guidance 1.7.21 (12)) The Recovery Capital Scale will be completed jointly by the Recovery Peer Specialist and the individual at the time of enrollment and will identify areas for improvement, change, and recovery goal setting. The resulting score can be monitored for improvement over time.
8. Opioid State Targeted Response-STR RecCap (FL SOR Guidance 1.7.21 (12)) Recovery Community Organizations (RCOs) will implement use of the Recovery Capital Scale as a component of the recovery planning process. Recovery capital is conceptually linked to natural recovery, solution-focused therapy, strengths-based case management, recovery management, resilience and protective factors, wellness and sustained recovery.
