| <b>Due Date:</b>    | 8 <sup>th</sup> of each month                    |

#### **I. Level Of Care Description**

The Florida Assertive Community Treatment (FACT) teams are a service delivery model for providing comprehensive community-based treatment to persons with serious mental illness. FACT is a self-contained mental health program made up of a multidisciplinary mental health staff who function as part of a team. This team provides the majority of an individual's treatment that is needed to achieve identified goals. The multidisciplinary team ensures integrated and ongoing intensive treatment that is individualized and includes assessment, rehabilitation, and community support services.

#### **II. Eligibility**

FACT Teams serve individuals aged 18 and older diagnosed with one of the following, as referenced in The Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, Text Revision (DSM-5-TR) or latest edition:

- Schizophrenia Spectrum and Other Psychotic Disorders,
- Bipolar and Related Disorders,
- Depressive Disorders,
- Anxiety Disorders,
- Obsessive-Compulsive and Related Disorders,
- Dissociative Disorders,
- Somatic Symptom and Related Disorders, and
- Personality Disorders.

The individual must meet **one** of the following seven criteria:

- More than three crisis stabilization unit or psychiatric inpatient admissions within one year,
- History of psychiatric inpatient stays of more than 90 days within one year,
- History of more than three (3) episodes of criminal justice involvement within one year,
- Referred by one of the state's correctional institutions for services upon release,
- Referred from an inpatient detoxification unit with documented history of co-occurring disorders,
- Referred for services by one of Florida's mental health treatment facilities, or
- High risk for hospital admission or readmission.

The individual must meet at least **three** of the following six characteristics:

- Inability to consistently perform the range of practical daily living tasks required for basic adult interactional roles in the community without significant assistance from others. Examples of these tasks include:
  - Maintaining personal hygiene,
  - Meeting nutritional needs,
  - Caring for personal business affairs,
  - Obtaining medical, legal, and housing services, and
  - Recognizing and avoiding common dangers or hazards to self and possessions.
- Inability to maintain employment at a self-sustaining level or inability to consistently carry out the homemaker role (e.g., household meal preparation, washing clothes, budgeting or child-care tasks and responsibilities).
- Inability to maintain a safe living situation (repeated evictions, loss of housing, or no housing).
- Co-occurring substance use disorder of significant duration (greater than six months) or co-occurring mild intellectual disability.
- Destructive behavior to self or others.
- High-risk of, or recent history of, criminal justice involvement (arrest and incarceration).

If the above admission requirements are met, substance use disorders and mild intellectual disabilities, as defined in the *DSM-5-TR*<sup>®</sup> or the latest edition, cannot be used as a basis to deny admission.

Individuals served may also have co-occurring substance use disorder.

If an enrollee is eligible for FACT services through Florida Medicaid, FACT providers must seek reimbursement for services from Florida Medicaid with the exception enhancement funds. Individuals will continue membership with their Managed Medical Assistance (MMA) Program or Long-term Care (LTC) Program for provision of medical services. FACT is responsible for coordinating behavioral health services and coordinating care with an individual's MMA or LTC Program.

### **Target Population**

When enrolling and maintaining capacity level, the FACT team must prioritize enrolling participants directly discharged from a state mental health treatment facility (SMHTF).

### **III. Service Description**

FACT Teams are implemented by community behavioral health providers that work collaboratively with eligible individuals and their families to explore their culture, beliefs, and values and work together to identify strengths, as well as needs. Through that process, goals for treatment are developed and adjusted as needed. The individual and FACT Team also work together to identify other, non-clinical supports needed.

FACT Teams are recovery-oriented, strengths-based, and person-centered. FACT Teams provide a comprehensive array of services, such as: behavioral health therapy; helping find and maintain safe and

stable housing; furthering education or gaining employment; education about mental health challenges and treatment options; assisting with overall health care needs; assisting with co-occurring substance abuse recovery; developing practical life skills; providing medication oversight and support; and working closely with individuals' families and other natural supports.

Program characteristics include:

- Primary provider of services and fixed point of accountability
- Services are primarily provided out of office
- Services are flexible and highly individualized
- There exists an assertive, "can do" approach to service delivery
- Services are provided continuously, throughout the individual's participation

The FACT Teams emphasize recovery, choice, outreach, relationship-building, and individualization of services. Enhancement funds are available to assist with housing costs, medication costs, and other needs identified in the recovery planning process. The number and frequency of contacts is set through collaboration rather than service limits. Service intensity is dependent on need and can vary from minimally once weekly to several contacts per day. This flexibility allows the team to quickly ramp up service provision when a program participant exhibits signs of decompensation before a crisis ensues. Teams must provide a minimum of 75% of all services and support in the community. This means providing services in areas that best meet the needs of the individual, such as the home, on the street, or in another location of the participant's choosing.

The FACT team is expected to assist program participants in attaining recovery goals, thereby enabling transition to less intensive community services. The team conducts regular assessments of the need for services and uses explicit criteria for participant transfer to less intensive service options. Transition is gradual, individualized and actively involves the participant and the next provider to ensure effective coordination and engagement.

FACT Team treatment is based on continuous need and there are no concrete timeframes associated with length of stay, however, services are designed to move individuals toward independence and are not to be considered lifelong services. The team approach to delivering services and lack of service limits make FACT a unique service.

### **Program Goals**

The FACT program goals are to:

- Implement with fidelity to the Assertive Community Treatment (ACT) model,
- Promote and incorporate recovery principles in service delivery,
- Eliminate or lessen the debilitating symptoms of serious mental illness and co-occurring substance use that the individual may experience,
- Meet basic needs and enhance quality of life,
- Improve socialization and development of natural supports,
- Support with finding and keeping competitive employment,
- Reduce hospitalization,
- Increase days in the community,

- Collaborate with the criminal justice system to minimize or divert incarcerations,
- Strengthen parenting skills for those who have children, and
- Lessen the role of families and significant others in providing care.

### **Staffing Requirements**

FACT Team staffing configurations combines practitioners with varying backgrounds in education, training, and experience. This diverse range of skills and expertise enhances the team's ability to provide comprehensive care based on individual needs. Hours of operation and staff coverage provide services seven (7) days per week, with overlapping shifts, operating a minimum of twelve (12) hours per day on weekdays, and eight (8) hours each weekend day and holiday. The Fact team operates an after-hours on-call system with a FACT Team professional on-call at all times.

The ratio of participants to direct service staff members<sup>1</sup> should not exceed 10:1. Within the guidelines of the prescribed staff-to-participant ratios, teams may exercise a degree of flexibility in team composition. However, a FACT Team must minimally include:

|                                                                                                                                        | <b>Small Team</b><br>(50 individuals <sup>2</sup> )                                                                                     | <b>Large Team</b><br>(100 individuals <sup>3</sup> )                                                           |
|----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|

### **Staff Roles and Credentials**

The provider must maintain a current organizational chart indicating required staff and displaying organizational relationships and responsibilities, lines of administrative oversight, and clinical supervision.

#### **○ Team Leader**

The Team Leader must be a full-time employee with full clinical, administrative, and supervisory responsibility to the team with no responsibility to any other programs during the 40-hour workweek and possess a Florida license in one of the following professions:

- Licensed Clinical Social Worker, Marriage and Family Therapist, or Mental Health Counselor licensed in accordance with Chapter 491, F.S.
- Psychiatrist licensed in accordance with Chapter 458, F.S.
- Psychologist licensed in accordance with Chapter 490, F.S.

The Team Leader is a practicing clinician providing FACT services and clinical supervision at least 50 percent of the time. The Team Leader is responsible for administrative, clinical, and quality oversight of the team. Preferably, the Team Leader is certified as a clinical supervisor. The Team Leader receives clinical supervision from the Psychiatrist or Psychiatric APRN and administrative supervision from the Chief Executive Officer or designee.

In the overall support of FACT team services and functions, the Team Leader is responsible for assigning a lead mental health professional and lead registered nurse. The lead mental health professional helps supervise comprehensive assessment, treatment planning, and delivering services.

The lead registered nurse serves as the lead nurse in medication, pharmacy, and other medical-service activities.

○ ***Psychiatrist or Psychiatric APRN***

The Psychiatrist or Psychiatric APRN provides clinical consultation to the entire team as well as psychopharmacological services for all participants. They also monitor non-psychiatric medical conditions and medications, provides brief therapy, and provides diagnostic and medication education to participants, with medication decisions based in a shared decision-making paradigm. If participants are hospitalized, they communicate directly with the inpatient psychiatric care provider to ensure continuity of care. The Psychiatrist and Psychiatric APRN also conducts home and community visits with participants as needed.

The Psychiatrist must be certified by the American Board of Psychiatry and Neurology (ABPN), or eligible to be board certified, and licensed in accordance with Chapter 458, F.S. If the team employs a Psychiatric APRN, they must be licensed in accordance with Chapter 458, F.S. and there must be access to a board certified, or board-eligible Psychiatrist for weekly consultation. A minimum of 0.32 hours of psychiatric services must be available for each FACT recipient per week (e.g., 32 hours for 100 FACT participants: 16 hours for 50 FACT participants).

○ ***Nurse***

The FACT Team must have a minimum of one full-time registered nurse (RN), with preference for those that possess a Psychiatric-Mental Health Nursing Certification (PMH-BC). Additional nursing staff may also be an RN or a licensed practical nurses (LPN), licensed in accordance with Chapter 464, F.S.

Nurses perform the following critical roles:

- Manage the medication system,
- Administer and document medication treatment,
- Screen and monitor participants for medical problems/side effects,
- Communicate and coordinate services with other medical providers,
- Engage in health promotion, prevention, and education activities (i.e., assess for risky behaviors and attempt behavior change related to their physical health),
- Educate other team members on monitoring of psychiatric symptoms and medication side effects, and
- With participant agreement, develop strategies to maximize the taking of medications as prescribed (e.g., behavioral tailoring, development of individual cues and reminders).

○ ***Peer Specialist***

There must be at least one full-time Peer Specialist. The Peer Specialist shall have lived experience with receiving mental health services for severe mental illness. Their life experience provides expertise that professional training cannot replicate.

Peer Specialists are fully integrated team members who provide individualized support services and promote self-determination and decision-making in recovery planning. Peer Specialists provide essential expertise and consultation to the entire team to promote a culture in which each team

member's point of view and preferences are recognized, understood, respected, and integrated into care.

Peer Specialists must be certified in accordance with Chapter 397, F.S. at the time of employment, or within one year of employment.

○ ***Substance Abuse Specialist***

There must be at least one full-time Substance Abuse Specialist with a bachelor's or master's degree in psychology, social work, counseling, or other behavioral science; and two years of experience working with individuals with co-occurring disorders. Bachelor's level substance abuse specialists must be certified as a Certified Addiction Professional in accordance with Chapter 397, F.S. at the time of employment, or within one year of employment.

The Substance Abuse Specialist provides integrated treatment for co-occurring mental illness and substance use disorders to participants who have a history of substance abuse. The services include:

- Substance use assessments that consider the relationship between substance use and mental health,
- Assessment and tracking participants' stages of change readiness and stages of treatment,
- Outreach and motivational interviewing techniques,
- Cognitive behavioral approaches and relapse prevention, and
- Treatment approaches consistent with the participant's stage of change readiness

The Substance Abuse Specialist also provides consultation and training to other team staff on integrated assessment and treatment skills relating to co-occurring disorders.

○ ***Vocational Specialist***

There must be at least one Vocational Specialist who has a bachelor's degree and a minimum of one year of experience providing employment services. The Vocational Specialist provides supported employment services as described in the Substance Abuse and Mental Health Services Administration's Supported Employment Evidence-Based Practices (EBP) KIT, which may be downloaded at: <https://store.samhsa.gov/product/Supported-Employment-Evidence-Based-Practices-EBP-Kit/SMA08-4364>. Current training and practitioner tools may also be accessed on the Individual Placement and Support (IPS) Employment Center website at <http://www.ipsworks.org/>.

The Vocational Specialist also provides consultation and training to other team staff on supported employment approaches.

○ ***Case Manager***

This position requires a minimum of a bachelor's degree in a behavioral science and a minimum of one year of work experience with adults with psychiatric disabilities. The Case Manager provides the rehabilitation and support functions under clinical supervision and are integral members of individual treatment teams. This includes social and communication skills training and training to enhance participant's independent living. Examples include on-going assessment, problem solving, assistance with activities of daily living, and coaching.

- ***Administrative Assistant***

An Administrative Assistant is responsible for organizing, coordinating, and monitoring the non-clinical operations of FACT. Functions include direct support to staff, including monitoring and coordinating daily team schedules and supporting staff in both the office and field. Additionally, the Administrative Assistant serves as a liaison between participants and staff, including attending to the needs of office walk-ins and calls from participants and natural supports. The Administrative Assistant actively participates in the daily team meeting.

### **Staff Communication and Planning**

The FACT team conducts daily organizational staff meetings at regularly scheduled times as established by the Team Leader. The team completes the following tasks during the daily meeting:

- Conduct a brief, clinically relevant review of all participants and contacts (i.e., phone calls, home visits, transporting, etc.) in the past 24 hours and document this information,
- Maintain a weekly schedule for each participant including all treatment and service contacts to be carried out to reach the goals and objectives in the participant's recovery plan,
- Maintain a central file of all weekly schedules,
- Develop a daily staff schedule consisting of a written timetable for all treatment and service contacts to be divided and shared by the staff working that day based on:
  - weekly schedule for each participant,
  - emerging needs,
  - need for pro-active contacts to prevent future crises, and
  - revision of recovery plans as needed and add service contacts to the daily staff assignment schedule per the revised recovery plans.

### **Treatment Planning Meeting**

The FACT team conducts treatment planning meetings under the supervision of the Team Leader. The treatment planning meetings must occur with sufficient frequency and duration to make possible for all staff to:

- Be familiar with each participant and their goals and aspirations.
- Participate in the ongoing assessment and reformulation of any problems that arise.
- Problem-solve treatment strategies and rehabilitation options.
- Ensure participant input in the development and revision of the recovery plan.
- Fully understand the rationale in order to carry out each participant's recovery plan.

### **Program Engagement**

The FACT Team conducts assertive outreach and engagement activities by recruiting new recipients at settings such as state mental health treatment facilities, hospitals, crisis stabilization units, emergency rooms, prisons, jails, and shelters. The FACT Team will screen for eligibility and obtain consent for participation in services.

If the individual being considered for FACT services is in a state mental health treatment facility, community hospital or crisis stabilization unit, the FACT Team will begin to engage them in person and participate in developing a discharge plan but will not provide services until they are discharged. Though the individual is not formally enrolled during the engagement process, the FACT team must keep the following written documentation:

- activities that took place during the engagement process and the individual's response to those activities
- the name of the FACT staff member(s) conducting the engagement activities.

### **Waiting List**

Waiting list records are created when an individual has been determined eligible for FACT services, but the FACT team is at maximum capacity and access is not immediately available. Consent to participate in FACT services by an individual must be obtained to add them to a waiting list.

### **Program Enrollment**

Once an individual expresses interest in, and desires for, participate in FACT services and meets eligibility requirements, the FACT team enrolls them in the program. The team should maintain a stable service environment when determining the total of new enrollees each month. The maximum number of participants (including Florida Medicaid recipients and individuals who are not Medicaid recipients) served by a small FACT Team is 60 individuals and 120 individuals by a large FACT team, unless otherwise approved by the Department of Children and Families (DCF).

### **Services and Supports**

The guiding principles to FACT team services includes participant choice, cultural competence, person-centered planning, rights of persons served, stakeholder inclusion, and voice.

Using this approach, the FACT team must provide the following services:

- **Outreach and Engagement**  
Educate and engage prospective participants for enrollment in FACT services. Assist with the transition of individuals from higher levels of care to FACT services.
- **Crisis Intervention**  
A FACT team member will be available 24/7, to assist with crisis intervention including referrals or supportive counseling when needed. Psychiatric backup/on-call support must be available during all off-hour periods.
- **Comprehensive Assessment**  
Within 60 days of admission to FACT, the team completes assessments to guide care.
- **Natural Support Network Development**  
Natural support network development is the process of establishing and/or strengthening personal associations and relationships, typically developed in the community, that enhance the quality and security of life for recipients. A natural support network may include family relationships; friendships reflecting the diversity of the neighborhood and the community;

association with fellow students or employees in regular classrooms and workplaces; and associations developed through participation in clubs, organizations, and other religious and civic activities.

- **Case Management**

The primary case manager, along with the team, coordinates care, advocates on behalf of the participant, and provides access to a variety of services and supports, including but not limited to:

- Primary health care (medical and dental),
- Basic needs such as housing and transportation,
- Educational and employment services, and
- Legal services.

For recipients enrolled in Medicaid managed care plans, the FACT team case manager will coordinate non-FACT services with the recipients' plan coordinators.

- **Enhancement Funds**

Funding is used to increase or maintain a person's independence and integration into their community. It may be used for costs related to housing, medications, employment, education, and specialized treatment not paid by any other means. Detailed guidelines on the use of enhancement funds may be found in Appendix A, and shall follow F.A.C. 65E-14.021(4)(k)4.b.(V).

- **Family Engagement and Education**

With consent of the participant, families are engaged in the treatment process and are educated on topics related to their family member's recovery goals, diagnosis, and illness management.

- **Psychiatric Services**

Psychiatric services must be provided by a psychiatrist or psychiatric APRN. Services include psychiatric evaluation, prescribing and/or administering and reviewing medications and their side effects, including pharmacological management, as well as support and training to the recipient.

- **Rehabilitation Services**

Rehabilitation services are provided by FACT Team members. These services provide structured, community-based services delivered in an individual or group setting. These services utilize behavioral, cognitive, or supportive interventions to improve a recipient's potential for establishing and maintaining social relationships and obtaining occupational or educational achievements. Rehabilitation services are provided to restore a recipient's skills and abilities necessary for independent living. Activities include:

- Development and maintenance of necessary daily living skills, such as independent living and social skills
- Food planning and preparation
- Money Management
- Maintenance of the living environment
- Training in appropriate use of community services
  - Housing Services
  - Pre-vocational and transitional employment rehabilitation training
  - Social support and network enhancement
- Work readiness assessments
- Job development on behalf of the recipient
- Job matching

- On-the-job training and support.
- **Substance Use and Co-occurring Services**

Both mental health and substance use needs are addressed through integrated screening and assessment, stage of change readiness determination, and therapeutic interventions consistent with the participant's readiness to change behaviors. The treatment approach is based on motivational interviewing and is non-judgmental, stresses engagement, and does not make sobriety a condition of continued treatment.
- **Supported Employment**

Services are individualized to assist recipients to obtain and maintain integrated, paid, competitive employment. Services may include:

  - Engagement and establishing a trusting, collaborative relationship directed toward the goal of competitive employment in integrated job settings
  - Assessment of vocational functioning on an ongoing basis
  - Following Supported Employment principles and procedures, helping job development and job search activities directed toward positions that are consistent with needs and interests
  - Providing individualized, time-unlimited, follow-along services to help sustain employment
  - Providing education and support to employers, which may include negotiating job accommodations and follow-along contact with employers
  - Providing outreach services, as necessary, when recipient may appear to disengage from services. If necessary, maintain contact even without a vocational focus to sustain engagement
  - Meet regularly with treatment team members to coordinate and integrate vocational services into mental health treatment
  - Draws up individual employment plans with recipient, case managers, and other treatment team providers and updates the plans quarterly
  - Spends at least 60 percent of direct service time in the community to engage and support recipient, family members, and employers
- **Therapy**

Clinicians provide and coordinate individual, group, and family therapy services. The type, frequency and location of therapy provided are based on individual needs and utilize empirically supported techniques for that individual and their symptoms and behaviors.
- **Wellness Management and Recovery Services**

The team assists participants to develop personalized strategies for managing their wellness, set and pursue personal goals, learn information and skills to develop a sense of mastery over their psychiatric illness, and help them put strategies into action in their everyday lives.
- **Transportation**

Staff assists with transportation to medical appointments, court hearings, or other related activities outlined in the care plan.

- **Supported Housing**

The team assists the participant in accessing affordable, safe, permanent housing of their choice through provision of multiple housing options with assured tenancy rights regardless of progress or success in services.

- **Competency Training**

For participants who are adjudicated incompetent to proceed, the team will provide competency restoration training and assist the participant through the legal process.

- **Initial Assessment and Recovery Plan**

The Team Leader in coordination with the Psychiatrist or Psychiatric APRN performs an initial assessment and develops an initial plan of care on the day of the participant's admission to the program. The participant and designated team members will be actively involved in the development of the plan. This is intended to ensure that immediate needs for medication, treatment, and basic needs are not delayed. The required components of an initial assessment, at a minimum, include:

- A brief mental status examination,
- Assessment of symptoms,
- An initial psychosocial history,
- An initial health/medical assessment,
- A review of previous clinical information obtained at the time of admission,
- A preliminary identification of the participant's housing, financial and employment status, and
- A preliminary review of the participant's strengths, challenges, and preferences.

### **Comprehensive Assessment**

The Team Leader assigns the individual's treatment team, including the Psychiatrist and Psychiatric APRN and primary case manager on the day of admission. The team is responsible for preparing a written comprehensive assessment within 60 days of the participant's admission to the program. The comprehensive assessment must meet the following requirements:

- Each assessment area is completed by the team member with skill and knowledge in the area being assessed and is based upon all available information.
- At minimum, the comprehensive assessment minimally includes:
  - Psychiatric history and diagnosis,
  - Mental status,
  - Strengths, abilities, and preferences,
  - Physical health,
  - History and current use of drugs or alcohol,
  - Education and employment history and current status,
  - Social development and functioning,
  - Activities of daily living,
  - Family and social relationships and support, and
  - Care recommendations.

- To supplement the comprehensive assessment, the team completes a psychiatric/social functioning history timeline no later than 120 days after the first day of admission.
- The team updates assessments at least annually and uses the updated assessments to update the recovery plan. All necessary areas essential for planning are included in the updated assessment.

### **Comprehensive Recovery Plan**

The team completes a comprehensive recovery plan as an expansion of the initial plan within 90 days of admission, following completion of all assessments. The Comprehensive Recovery Plan shall adhere to the following guidelines:

- Planning is person-centered and actively involves the participant, guardian (if any), and family members and significant others the participant wishes to participate.
- The plan is reviewed and updated minimally every six (6) months during planned meetings, unless clinically indicated earlier, by the treatment team and the participant.
- The plan is based on assessment findings and:
  - Identifies the participant's strengths, resources, needs and limitations,
  - Identifies short and long-term goals with timelines,
  - Identifies participant's preferences for services,
  - Outlines measurable treatment objectives and the services and activities necessary to meet the objectives and needs of the participant, and
  - Targets a range of life domains such as symptom management, education, transportation, housing, activities of daily living, employment, daily structure, and family and social relationships, should the assessment identify a need and the individual agrees to identify a goal in that area.

### **Assertive Community Treatment Transition Readiness Scale (ATR)®**

The Assertive Community Treatment Transition Readiness Scale (ATR)® is a clinical tool used by FACT Teams to: 1) identify individuals ready to transition from FACT to less intensive services and/or 2) inform an individual's recovery plan and monitor overall progress.

The ATR or comparable ACT transition assessment (with Department approval), must be completed for each participant **at least once annually**. If the ATR is used by a FACT Team to monitor an individual's overall progress, it is recommended that the ATR be **administered** at regular **intervals** throughout the course of receiving FACT services.

The ATR can be completed by a single FACT staff member or as a team. The intent of the ATR is not to replace clinical and professional judgment but to potentially reduce inherent subjectivity and bias. Details regarding administration and scoring of the ATR can be found in Appendix C.

### **Active Engagement**

As FACT services are voluntary, FACT teams should utilize techniques such as motivational interviewing to maintain engagement and relationships with participants. The FACT team should also look for markers or behavior that might indicate a member would need more assertive engagement. These signs could include missing appointments, lack of good rapport or trust in the therapeutic relationship, inpatient placement,

increased or frequent crisis situations, homelessness or risk of homelessness, loss of natural supports, high risk behaviors, or substance use that may be interfering with ability to engage in treatment.

Treatment planning and subsequent therapeutic interventions must reflect appropriate, adequate, and timely implementation of all treatment interventions in response to changing needs.

### **Administrative Tasks**

The FACT team performs administrative tasks that include the following:

- Establishment and maintenance of written policies and procedures for:
  - Personnel,
  - Program organization,
  - Admission and discharge criteria and procedures,
  - Assessments and recovery planning,
  - Provision of services,
  - Medical records management,
  - Quality assurance/quality improvement,
  - Risk management, and
  - Rights of persons served.
- Accurate record-keeping reflecting specific services offered to and provided for each participant, available for review by the Managing Entity and Department staff,
- Coordination of services with other entities to ensure the needs of the participant are addressed,
- Providing staff training and supervision to ensure staff are aware of their obligations as an employee, and
- A plan for supporting participants in the event of a disaster including contingencies for staff, provision of needed services, medications, and post-disaster related activities.

### **Discharge Planning And Transition**

Discharge planning should begin immediately upon intake and the expectations and course of treatment should be discussed with the participant during the admission process. FACT Teams should discuss achievement of long-term goals and markers for discharge at each treatment plan update and assess for discharge readiness throughout the duration of engagement with FACT Team services, including barriers to discharge, progress of discharge planning, and any changes to discharge plans.

FACT Teams shall base readiness for discharge on the attainment of mutually agreed upon goals. When gauging discharge readiness, FACT Teams may utilize the ATR. FACT teams may also utilize additional assessment methods or tools to gauge discharge readiness.

### **Transition**

During the daily meetings, the FACT Team shall assess participants for the continued need for FACT services. If it is determined that the participant could be successful in a lower level of care, the team shall start addressing transition goals with the participant.

When a participant is determined ready to transition to a lower level of care, the FACT team shall update the treatment plan to reflect transition plans and services. This time period should continue to focus on independence in all areas of life and the team working to support the participant in moving toward utilizing outpatient treatment services, natural supports, and other community resources so that the member is able to become comfortable with utilizing a variety of supports on a more independent basis.

The FACT team will provide psychoeducation to the participant and any natural supports involved around types of treatment services and community supports that are available once discharge occurs.

It is encouraged that FACT Team members either attend initial appointments with community psychiatric services with the participant or at a minimum follow up with both the participant and the community service provider to verify attendance and offer assistance in identifying and rectifying any barriers that may exist to successful transition.

### **Transfers**

When a participant plans to move out of the area, the Managing Entities are responsible for coordinating transfers to the new location. The originating Managing Entity will contact the receiving Managing Entity to determine if there is capacity to accept the transfer and a proposed date of transfer. Once this has been established, the originating FACT team must, with consent, send the receiving team a comprehensive referral packet.

FACT Teams are obligated to accept any transfers if the team has capacity. Both the originating and receiving teams will make every effort to ensure the participant has stable housing. Upon arrival, the receiving team shall review the participant's clinical records, conduct an initial assessment and admission process, assess the person's current medication regime, consult with the program Psychiatrist, and conduct a new comprehensive assessment or develop a new recovery plan.

When an individual meets criteria and there is capacity, the team must accept and enroll all referrals from the Departments' Substance Abuse and Mental Health regional office or the Managing Entity

### **Discharge Categories**

FACT team shall discharge participants based on the following categories:

- The participant demonstrates an ability to perform successfully in major role areas (i.e., work social, and self-care) over time without requiring assistance from the program and no longer requires this level of care (i.e. successful completion).
- The participant moves out of the FACT team's service area.
- The participant requests discharge or chooses not to participate in services, despite the team's repeated efforts to develop a recovery plan acceptable to the participant.
- Following a six (6) month period in which the participant has been admitted to a state mental health treatment facility and there is no anticipated date of discharge.
- The participant has been adjudicated guilty of a felony crime and subsequently sent to a state or federal prison for a sentence that exceeds one (1) year. Otherwise, the participant remains enrolled with the FACT Team.
- The participant was admitted to a nursing facility for long-term care due to a medical condition, and there is no anticipated date of discharge.

- The participant dies.

### **Discharge Documentation**

The FACT team must document the discharge process in the participant's medical record, including:

- The reason(s) for discharge.
- The participant's status and condition at discharge.
- A final evaluation summary of the participant's progress toward the outcomes and goals set forth in the recovery plan.
- A plan developed in conjunction with the FACT participant for treatment upon discharge and for follow-up that includes the signature of the primary case manager, Team Leader, Psychiatrist/Psychiatric APRN, and the participant or legal guardian. If the FACT participant or guardian is not available to sign the discharge plan, the reason will be documented in the plan.
- Documentation of referral information made to other agencies upon discharge.
- Documentation that the participant was advised he or she may return to the FACT Team if they desire, and space is available.

### **Fact Advisory Committee**

Advisory committees are a group of volunteer stakeholders that support and guide a FACT Team. The advisory committee's primary function is to promote quality and assist in the oversight of the program through monitoring, problem solving, and mediating grievances or complaints made by participants or their families. Details regarding implementation and operation of the advisory committee, including a FACT Model Fidelity Review sample, can be found in Appendix B.

## **IV. Outcome Measures**

The FACT Team is required to meet the following numerical targets for the target population "Adults with Serious and Persistent Mental Illness" as established in the General Appropriations Act:

- Percent of adults with severe and persistent mental illnesses who live in stable housing environment that is equal to or greater than 90 percent or the most current General Appropriations Act working papers transmitted to the Department of Children and Families; and,
- Average annual days worked for pay for adults with a severe and persistent mental illness that is equal to or greater than 40 days worked for pay or the most current General Appropriations Act working papers transmitted to the Department of Children and Families.

The FACT Teams must incorporate the following performance measures:

- Every quarter, *fewer than 20 percent of all individuals enrolled* will be admitted to a Baker Act Receiving Facility.
- Every quarter, *fewer than 5 percent of all individuals enrolled* will be admitted to a State Mental Health Treatment Facility.
- On an annual basis, *75 percent of all individuals served* will either maintain or show improvement in their level of functioning, as measured by the Functional Assessment Rating Scale (FARS).

FACT teams must also incorporate the following process measures:

- 90 percent of all initial assessments shall be completed on the day of enrollment with written documentation of the service occurrence in the clinical record.
- 90 percent of assessments to determine willingness to seek vocational goals will be completed within 60 days of enrollment with written documentation of the service occurrence in the clinical record.
- 90 percent of all comprehensive assessments will be completed within 60 days of enrollment with written documentation of the service occurrence in the clinical record.
- 90 percent of all comprehensive recovery plans will be completed within 90 days of enrollment with written documentation of the service occurrence in the clinical record.
- 90 percent of all psychiatric/social functioning history timelines will be completed within 120 days of enrollment with written documentation of the service occurrence in the clinical record.
- While enrolled, 50 percent of all individuals served will receive supported employment services<sup>5</sup> toward a goal of obtaining or maintaining paid, competitive employment within one year of enrollment with written documentation of the service occurrence in the clinical record.
- While enrolled, 90 percent of all individuals served will receive an assessment to determine independent housing goals within one year of enrollment with written documentation of the service occurrence in the clinical record.
- Every month, 90 percent of the staffing requirements will be maintained including required FACT Team composition and ratio of participants to direct service staff members.

## V. Required Reports

FACT teams are responsible for submitting the following reports to the managing entity in a timely and accurate manner:

- **Template 29 - FACT Report**

This report displays essential data for the Department to determine outputs and outcomes. Network Service Providers must submit the **Template 29 - FACT Report** found at following link using the applicable fiscal year: <https://www.myflfamilies.com/services/samh/providers/managing-entities> due monthly by the 8th following service delivery to the Network Manager and Clinical Department.

- **Monthly Census Worksheet**

This monthly report in Excel displays the following information for all individuals enrolled during the reporting month, regardless of payor source:

- Last name
- First name
- Middle initial **or**, if unknown, 'X'
- Date of birth (mm/dd/yyyy)

---

<sup>5</sup> The Supported Employment Evidence-Based Practices (EBP) KIT may be accessed at: <https://store.samhsa.gov/product/Supported-Employment-Evidence-Based-Practices-EBP-Kit/SMA08-4364>

- Social Security Number (no dashes) **or**, if unknown, **pseudo-SSN**
  - as indicated by the Department’s FASAMS Pamphlet 155-2 Version 14, Chapter 1, or latest version<sup>6</sup>
- Date of enrollment (mm/dd/yyyy)
- Date of discharge (mm/dd/yyyy)
- **FACT Enhancement Reconciliation Report**

This quarterly report displays the team’s monthly expenditures of enhancement funds and is due to the Network Manager quarterly by the 8<sup>th</sup> of the month.
- **Vacant Position(s) Reports**

This monthly report displays required FACT Team composition (as indicated in section III) and whether the positions are filled or vacant for the reporting month. This report also displays the ratio of participants to direct service staff members on the last day of the month. This report is due to the Network Manager and Clinical Department as vacancies occur. The Template for this report is incorporated herein.
- **FACT/Disability Rights Florida Mental Health Transitional Voucher Report**

See Incorporated Document 34 - Transitional Voucher. This report is due to the Network Manager and Clinical Department by the 8<sup>th</sup> of each month with your monthly invoice data. The Template for this report is incorporated herein.
- **FACT Referral Report**

This report displays the new admissions and referrals received for the month and is due to the Network Manager and Clinical Department monthly by the 8<sup>th</sup> of each month. The Template for this report is incorporated herein.
- **Outcome Measure Data Collection Tool**

This report will be completed in July to include data for each individual enrolled on the team. It will then be updated with each admission and discharge as needed and submitted to the Network Manager and Clinical Department by the 8<sup>th</sup> of each month. The Template for this report is incorporated herein.

## VI. Managing Entity Responsibilities and Expectations

The Managing Entities are responsible for:

- Oversight of FACT requirements including report and invoice approvals
- Provision of technical assistance to FACT Teams as needed
- Participation in and oversight of advisory committees
- Assistance with the timely and efficient transfers from state mental health treatment facilities to teams
- Identification of need for additional FACT teams
- Monitoring of the program including:

---

<sup>6</sup> Financial and Services Accountability Management System (FASAMS): <https://www.myflfamilies.com/services/samh/providers/FASAMS>

- Medical record reviews
- Personnel records review
- Policy and procedure reviews
- Staff credentials review
- Participant interviews
- Follow up with corrective action plans, if indicated.

Managing Entities shall determine the eligibility of Network Service Providers and non-Network Service Providers to provide services funded with FACT Enhancement Funds.

- Such determination will be based on licensure or certification in good standing, history of licensing or certification complaints, appropriateness of services, staff training and qualifications, evidence of staff and organizational competency, interviews with organization staff, and other knowledge of significance unique to the individual provider.
- Treatment providers must be licensed by the Department, Agency for Health Care Administration (AHCA), or a related professional license.
- Recovery support providers must provide documentation of applicable professional certifications, excluding providers which are licensed by the Department, are licensed by AHCA, certified by the Florida Association of Recovery Residences (FARR), or are active affiliates of the Oxford House, Inc. network.

Florida Assertive Community Treatment (FACT) will be administered according to DCF Guidance 16, which can be found at following link using the applicable fiscal year:  
<https://www.myflfamilies.com/services/substance-abuse-and-mental-health/samh-providers/managing-entities>.

## **Appendix A – FACT Enhancement Guidelines**

### **Introduction**

One of the goals of FACT is to promote and respect self-determination, recovery, and full community inclusion. Participation provides the individual with the opportunity to select the services and commodities that they deem necessary for recovery for the purpose of consumption, housing needs, employment, volunteering, or training/education, and facilitates achievement of the individual's recovery plan.

An integral part of participation is accepting responsibility for choosing, spending, recording, and learning how best to use limited funds to achieve a desired state of mental wellness and productivity. The program believes that individuals can purchase needed services and commodities that will help them on their road to recovery. Individual choice drives this system of purchasing.

The program provides access to public funds to purchase adjunct services or commodities not directly provided by the FACT Team. Funding is used to increase or maintain a person's independence and integration into their community. Funding may be used for costs related to housing, pharmaceuticals, tangible items needed for employment/education or other meaningful activity, and specialized treatment (not paid by any other means).

### **Definitions**

1. "Assistive Care Services" or "ACS" means a state payment for services provided by qualified residential care facilities. Funds transferred from the Department of Children and Families to Medicaid draw down federal Title XIX matching funds. This Medicaid optional state plan service is for low-income people who live in qualified assisted living facilities (ALFs), adult family-care homes (AFCHs), and residential treatment facilities (RTFs).
2. "Commodities" means supplies, materials, goods, merchandise, equipment, information technology, and other personal property. The definition does not include pharmaceuticals, medical treatment, glasses, hearing aids, or lab work.
3. "Indigent Drug Program" or "IDP" means the provision of psychotropic medications for individuals served by the Department who have a mental illness, reside in the community, and do not have other means of purchasing prescribed psychotropic medications.
4. "OSS" means Optional State Supplementation, a state program to supplement payments to eligible individuals residing in Assisted Living Facilities, Adult Family-Care Homes, family placement, or any other specialized living arrangement.
5. "Payer of Last Resort" means using FACT enhancement funds after exhausting all other potential sources of funds.
6. "Recovery Plan" means an individual's service/treatment plan.
7. "Services" means pharmaceuticals, lab work, treatment, housing assistance, or other assistance given to benefit a person.
8. "SSDI" means Social Security Disability Income that is paid to a person and certain members of the person's family if the person is "insured", meaning the person has worked the required number of quarters and paid Social Security taxes.
9. "SSI" means Supplemental Security Income, a federal income supplement program funded by general tax revenue designed to provide cash to help aged, blind and disabled people who have little or no

income to meet basic needs for food, clothing, and shelter.

### **Guidelines on the Use of Funds**

#### **1. Ensuring FACT Team enhancement funds are the payer of last resort**

Participants must take responsibility for locating other sources of funding for services or commodities before requesting FACT enhancement funds for the purchase. FACT staff, in collaboration with the participant, must determine if there is another payer source, such as Medicaid, Medicare, OSS, SSI, SSDI, IDP, or ACS. The primary case manager must submit a certification form with the monthly invoice. The certification states that due diligence was exercised in searching for alternative funding to pay for the commodity or service before the use of enhancement funds. If the commodity or service is ongoing, certification is only required for the original purchase. Examples of ongoing purchases include utility and phone bills, refills of existing prescriptions, or any other commodity or service.

#### **2. Price Quotes**

Participants are required to provide three price quotes from different vendors for any single commodity costing more than \$300. These price quotes may be in the form of vendor circulars or advertisements, vendor website items and price descriptions, in-store price comparisons, and telephone price quotes. Telephone should only be considered if other means of securing a price quote are not possible. Quotes received over the phone and in-store must be verified/witnessed by staff and documented (including date and time). Documentation of the price quotes must be filed (may be a separate file from the clinical record) and available for audit when requested.

#### **3. Emergency purchase**

An emergency is considered an unexpected event that causes immediate danger to the health, safety, or welfare of the individual. In such cases, there might not be time to secure three price quotes (e.g., towing a vehicle from the roadway). An emergency purchase without three quotes must be justified and documented to be considered for payment or reimbursement. Emergency purchases must be documented in the clinical record, and if deemed an ongoing need, must be added to the recovery plan.

#### **4. Recovery plan**

The member's recovery plan must incorporate the purchase of any commodity or service. The member's recovery plan must explain how the purchase will promote one or more of the member's recovery goals.

#### **5. Dental services, hearing aids, and eyeglass purchases**

Medically necessary (recommended by medical practitioner) professional hearing, dental, and vision services will be paid for by the program after all other resources have been exhausted. Decorative or cosmetic purchases, such as color contacts, may not be paid for with FACT enhancement funds.

#### **6. Payment / Reimbursement rate**

Commodities and services purchased are paid or reimbursed at a negotiated rate between the participant and the FACT case manager and are dependent on the participant's ability to pay.

#### **7. Making the purchase**

The accepted purchase price (quotes and receipt) must be dated after the incorporation of the purchase into the recovery plan. For approved purchases, the participant can either:

- a. Make the purchase using his or her funds and later, be reimbursed, or
- b. Provide an original, itemized estimate of the needed purchase that shows the name of the vendor, the anticipated purchase date, the item, and the amount of the purchase (along with

documentation of price quotes).

The amount paid or reimbursed will include the actual price of the item and may include tax, if applicable. Tips are not reimbursed. It is the participant's responsibility to ensure the quality of the item purchased. If a purchased item is defective, inoperable, or unusable, it is the participant's responsibility to resolve the matter with the vendor.

**Criteria for purchase approval (Must be able to answer "yes" to all questions)**

1. Does the purchase directly relate to the identified needs outlined in the participant's recovery plan?
2. Does the purchase promote independence?
3. Will the purchase enhance employability or recovery for the individual?
4. Have all other options been explored and exhausted before requesting the purchase with FACT enhancement funds?
5. Is the amount of the proposed expenditure reasonable?
6. Is the budget to fulfill the request available?
7. Is the date on the receipt for the purchase after the effective date of the current recovery plan?
8. Is the receipt original?
9. Does the receipt contain vendor information printed on the receipt (name of vendor, address, phone number, etc.)?

**Examples of purchases that may be authorized if all criteria above are met**

1. Co-pays for adjunct services purchased with Medicaid or Medicare funds.
2. Housing subsidy. Enhancement funds may be used for payments to Assisted Living Facilities (above OSS rate), but all available options that could best meet the individual's needs should be considered (such as Therapeutic Family Care homes, permanent supportive housing, rental subsidies for current lease).
3. Medication.
4. Transportation or mileage reimbursement.
5. Services related to developing employability.
6. Smoking cessation activities under the supervision of a medical doctor.
7. Non-cosmetic dental work.
8. Hearing aids.
9. Non-cosmetic eyeglasses and non-disposable contacts once per year, unless otherwise noted by a licensed eye care professional.
10. Facial cosmetic and make-up products for camouflaging medical conditions, such as facial scars, burns, etc., and to seek or participate in employment.
11. Tutoring.
12. Face-to-face and distance learning educational classes.
13. Time-limited assistance to secure or maintain a more independent living arrangement.
14. Time-limited assistance with vehicle repair for purposes of employment, education and/or

transportation or other recovery goal with the intent to increase independence for the person served. Alternative transportation (bus, bike, cab use) should be considered instead of vehicle repair if the cost to repair is more than \$1,000.00 or the budget does not permit the expenditures.

15. Specialized treatment not provided by the FACT Team and not paid for by any other means (e.g., eating disorders, behavioral analyst, health club/gym). Approval must be obtained from the Managing Entity for expenditures exceeding \$1,500.00. 20
16. Support tools promoting the safety and security of the individual, including fire alarms, and disability aids such as chair, shower or stair rails when explicitly justified by the individual's recovery plan and no other resource is available

**Examples of disallowed purchases:**

1. Rent reimbursement for an expired rental lease.
2. Payments to facilities or recovery residences that are not licensed or certified in good standing according to state law.
3. Motel room(s) beyond 21 days. Motel rooms for more than 21 days may be authorized if the team makes an ongoing and consistent effort to find more permanent housing, and this is fully documented in the recovery plan.
4. Purchase of automobiles, sport utility vehicles (SUVs), minivans, motorcycles, recreational scooters, or recreational vehicles.
5. Major repairs or renovations of rental property.
6. Pay-per-view or enhanced programming cable or satellite service.
7. Television, Video Cassette Recorders (VCRs), Digital Video Disc (DVD) or Blu-ray players, video game consoles, stereos, MP3 Players, iPods, iPads, or other types of entertainment appliances.
8. Designer sunglasses.
9. Beauty aids such as spa services, including but not limited to facials, makeup applications, aromatherapy massage, body waxing, manicure, pedicure, therapeutic body wraps, microdermabrasion, tanning booth sessions, wigs and hair pieces, or cosmetics (aside from the purposes described above).
10. Ongoing or continuous purchase of over-the-counter medications over 7 days per episode for allergies and flu-like symptoms.
11. Acupuncture without a prescription/order/referral from the program Psychiatrist.
12. Petty cash for general use.
13. Purchase or rental of firearms.
14. Purchase of alcoholic beverages.
15. Purchase of contraband or illegal products or services.
16. Purchase of tobacco products.
17. Purchase of pets.
18. Purchase or rental of boats.
19. Purchase or lease of burglar alarms.

- 20. Purchase or lease of cell phones.
- 21. Purchase or lease of diving equipment.
- 22. Internet service.
- 23. Purchase for 3rd parties.
- 24. Purchase of pornographic books, magazines, or videos.
- 25. Payment of credit card interest or balances.
- 26. Payment of court-ordered costs, fines, restitution, or other similar debts.

## **Participant Certification and Assurances**

**FACT Team participants are not guaranteed access to enhancement funds. Purchase approval is dependent on the following guidelines:**

- All other options have been explored and exhausted before requesting the purchase with FACT enhancement funds.
  - The purchase directly relates to the identified needs outlined in the participant's recovery plan.
  - The purchase promotes independence.
  - The purchase enhances employability or recovery for the individual.
  - The amount of the proposed expenditure is reasonable.
  - The budget to fulfill the request is available.
  - The date on the receipt for the purchase must be after the effective date of the current recovery plan.
  - Individuals must provide an original receipt.
  - The receipt must contain vendor information printed on the receipt (name of vendor, address, phone number, etc.).
1. By signing below, I agree to adhere to these guidelines and understand that I am responsible for the outcome of all purchases that I make under this program.
  2. I agree not to hold the FACT program responsible if I make purchases that are beyond the scope of purchases incorporated into my recovery plan amount and understand that the program is not responsible for the choices I make regarding my finances.

The FACT participant receives a signed copy of these guidelines. The original signed document remains part of the participant's clinical record.

I, \_\_\_\_\_, have received, reviewed, and agree to the Florida ACT Enhancement Funds guidelines.

**Certification Statement as Payer of Last Resort**

(Required only on initial purchases of commodities and services)

Name of FACT Participant: \_\_\_\_\_

Date of Purchase: \_\_\_\_\_

Name of Vendor: \_\_\_\_\_

Cost of Item/Service: \_\_\_\_\_

Item(s)/Services Purchased: \_\_\_\_\_

Relationship to Recovery Plan (Complete the following table):

| Recovery Plan Goal                                          | Relationship to Purchase |
|-------------------------------------------------------------|--------------------------|
| What goal on the recovery plan does this purchase relate?   |                          |
| How will this purchase assist in meeting the goal?          |                          |
| How many more times is this service estimated to be needed? |                          |

I, \_\_\_\_\_, primary case manager and/or member of the above-named individual's Treatment Team, certify that this purchase is made to support the person's recovery plan. I further certify that all other resources have been explored and exhausted prior to purchasing this service/commodity with payer of last resort enhancement funds.

Date

## **APPENDIX B-FACT ADVISORY COMMITTEES**

The FACT Advisory Committee (Committee) is a group of volunteer stakeholders that come together to ensure the FACT Team's work is consistent with SAMHSA's Assertive Community Treatment (ACT) Evidence-Based Practices (EBP) KIT.<sup>7</sup> The Committee's primary functions are to promote quality FACT programs and assist in the oversight of the program through monitoring, problem solving, and mediating grievances. Committees are independent of the provider operating the team and therefore have no role in the governance of the team. Committees may, at their discretion, develop additional procedures beyond those identified below.

### **Purpose:**

The purpose of a FACT Committee is to guide and support local FACT team activities by monitoring on-going operations; promoting the team's work in the community; and ensuring the team provides each participant quality and recovery- oriented services.

### **Membership:**

The contracting managing entity (ME) approves individual membership to the Committee. Committees have a minimum of 10 members that consist of at least 26 percent people with psychiatric disabilities and 25 percent family members. Other members may represent stakeholders such as local homeless coalitions, local law enforcement agencies, jail personnel, county commissioners, other providers, hospital representatives, Medicaid, faith-based entities and advocacy groups. Membership that is representative of the local cultural and linguistic populations is strongly encouraged. The Committee must be committed to promoting recovery and empowerment.

The provider operating the FACT team is responsible for recruiting Committee members. Names of nominated individuals are submitted to the contracting ME for approval of membership. Membership may be rescinded if, in the view of the contracting ME an adversarial relationship has developed between the provider, Committee and the contracting managing and a good faith effort on the part of the ME to resolve the adversarial environment has failed.

### **Membership Qualifications:**

Committee members should be knowledgeable about psychiatric disabilities and the challenges that people with these disabilities face living in the community. Members should be good problem solvers with a positive attitude and be objective and seek to understand the views of all stakeholders. People in recovery and their families are strong candidates for membership.

### **Membership Requirements:**

Committee members become familiar with the Program Standards for ACT Teams and the FACT Handbook. Committees meet quarterly or more frequently if desired and members agree to serve at least a 2-year term, staggering termination to maintain a core of experienced members on the Committee. Although Committee Bylaws are not required, it is suggested the Committee elect a Chairperson. If a Chairperson is elected, the Committee must establish a protocol for such election including term of office, method of election, including use of proxy votes and specific duties of the Chairperson. Minutes of Committee meetings are recorded and submitted to the provider's Chief Executive Officer, the FACT Team Leader, and Managing Entity staff.

---

<sup>7</sup> The Assertive Community Treatment (ACT) Evidence-Based Practices (EBP) KIT may be accessed at: <https://store.samhsa.gov/product/Assertive-Community-Treatment-ACT-Evidence-Based-Practices-EBP-KIT/SMA08-4344>

**Approving and Rescinding Membership:**

The contracting ME may use the following criteria in approving and rescinding membership on Committees. These guidelines are subject to change based upon the accumulation of practices, data and issues that may evolve over the course of time and experience.

**Approving Membership**

- Expressed willingness to volunteer time,
- Expressed interest in Florida's adult community mental health service delivery system,
- Expressed willingness to learn the ACT model of service intervention,
- Expressed willingness to participate in public forums,
- Meets at least one of the membership groups identified as representative of community stakeholders, and
- Has been approved by the contracting ME.

**Rescinding Membership**

- Repeated unexcused absence from Committee meetings (as determined by the Chair); or
- Creating an adversarial environment that is prolonged for three months or more and such environment diminishes the supportive, collaborative relationship that must exist between the contracting ME, the provider and the Committee.

**FACT Advisory Committee Member Roles:**

1. Advocating on behalf of individuals with psychiatric disabilities.
2. Becoming knowledgeable of the ACT model.
3. Identifying community resources for the team such as affordable housing, employment opportunities, and social outlets/supports.
4. Promoting awareness of the team in the community through community dialogues when requested.
5. Providing support, guidance and assistance to the FACT team.
6. Monitoring ACT fidelity by administering the "FACT Model Fidelity Review" on an annual basis.<sup>8</sup>
7. Participating in planned technical assistance site visits conducted by the ME to FACT teams.
8. Mediating complaints or grievances between meetings. It is the responsibility of the Chair to convene a mediating panel made up of three Committee members.
9. Spending at least one day observing a daily organizational meeting, recovery planning meeting or accompanying a team member on a field visit (with consent).<sup>9</sup>
10. Reviewing and commenting on the FACT team's enhancement expenditures and monthly FACT ad hoc data reports.
11. Developing a schedule of activities for the year.
12. Serving as a resource to the team to problem-solve local issues that may be barriers to successful outcomes.
13. Participating in the development of a protocol for communications between the team, its administration and the ME to be approved by the ME prior to implementation.<sup>10</sup>

---

<sup>8</sup> The FACT Model Fidelity Review is a modified form of the PACT Model Fidelity Review published by the National PACT Center and contains recommended standards. The protocol is attached to this Appendix C, revised May 2014.

<sup>9</sup> Due to the size of Advisory Committees, no more than 2 members should schedule attendance at any one meeting at any given time and with prior agreement by the team leader.

<sup>10</sup> A suggested format is attached but may be modified at the discretion of the entities developing the protocol.

**Providers' Role Relating to FACT Advisory Committees:**

1. Attending Committee meetings by the FACT team leaders and the provider's Chief Executive Office/Executive Director or designee.
2. Providing FACT enhancement expenditures and FACT monthly ad hoc data reports.
3. Providing any grievances/complaints and their outcome.
4. Forwarding of grievances/complaints not resolved at the team level within two weeks from date of filing to the team's Committee Chair who will convene a grievance mediating panel.
5. Participating in the development of a communication protocol between the team, its administration, the Committee and the ME for approval from the ME prior to implementation.
6. Providing the Committee with the necessary administrative support to ensure that documents are provided and minutes of meetings are distributed.

**Managing Entity's Role Relating to FACT Advisory Committees:**

1. Inviting the Chair of the Committee to participate in on-site technical assistance and programmatic monitoring completed by the ME.
2. Attending Committee meetings.
3. Participating in the development of a communication protocol between the team, its administration, the Committee and the ME. Upon completion, prepare an approval memo to the team, its administration and the Committee that the protocol is approved for implementation.
4. Serving as a liaison and resource person to the Committee for system issues that impact the team's successful outcomes.

**Confidentiality**

By law, Committee members do not have access to the medical record of participants without the specific, written agreement of the individual. Committee members who may also serve on other councils or entities that, in the course of their duties, have statutory authority to access and review medical records are prohibited from sharing the findings of such reviews with other Committee members without the specific, written agreement of the individual. The specific agreement must be time-limited and can be changed by the individual at any time.

**FACT Advisory Committee Agenda Template**

Committee meetings address the following items:

- Call to Order and roll call;
- Report of Committee Activities;
- Report on Enhancement Expenditures;
- Report on the FACT Quarterly Data; and
- Report on Grievances Mediated and Outcomes.

*Other Business*

*Next Meeting Date*

*Adjournment*

**Suggested Format for Communications Protocol**

See below.

**Instructions for Completing the FACT Model Fidelity Review**

This is a quality improvement exercise and not intended to serve as a contractual compliance activity. Committee members conducting this survey are prohibited from reviewing individual clinical records. Feedback to the team leader at the end of the review will be helpful for continuous quality improvement. This activity will require 7 exercises:

1. Reviewing the staffing chart,
2. Reviewing position descriptions,
3. Reviewing policies and procedures,
4. Touring the entire team office space,
5. Interviewing the team leader,
6. Observing a daily organizational meeting, and
7. Reviewing the posted 2-month schedule of treatment team meetings.

Using the attached FACT Model Fidelity Review instrument, please complete the following:

1. Check either “Y” for yes or “N” for no at the time of the review,
2. Please note any discrepancies from the standards on a separate page, and
3. Using the results of the survey, prepare a summary of findings to share with the Team Leader.

## FACT Advisory Committee Communication Protocol

**Purpose:** The purpose of this protocol is to ensure that a mechanism of communication is in place that enables the Committee, the provider, the contracting ME and the team to conduct its business while promoting the goals of the FACT initiative. This protocol is not intended to restrict any form of communication between individuals or entities but is intended to establish an agreement between the entities referenced above as to a preferred schedule of time for such communications.

**Hours of Communication:** It is agreed by all parties that business relating to the mission and intent of the Committee can best be served by calling between the hours of \_\_\_\_ and \_\_\_\_ Monday through Friday. Weekends and holidays will not be used for conducting routine business.

**Communication Contacts:** It is agreed by all parties that the following persons and phone numbers will be designated the primary and secondary contacts:

*Primary Contacts:*

For the Committee \_\_\_\_\_ Phone \_\_\_\_\_

For the FACT Team \_\_\_\_\_ Phone \_\_\_\_\_

For the Managing Entity \_\_\_\_\_ Phone \_\_\_\_\_

*Secondary Contacts:*

For the Committee \_\_\_\_\_ Phone \_\_\_\_\_

For the FACT Team \_\_\_\_\_ Phone \_\_\_\_\_

For the Managing Entity \_\_\_\_\_ Phone \_\_\_\_\_

**Mitigating Factors:** It is agreed by all parties that certain situations may arise that require the parties to prepare, locate, copy and fax or e-mail information. When a request is made for written information, it is agreed that an appropriate response time to complete the request is \_\_\_\_ days from the date of the request.

**Agreements:** The parties, by their signature, will make a good faith effort to communicate with each other within the agreed upon parameters established above.

For the Committee \_\_\_\_\_ Date \_\_\_\_\_

Program Guidance for Contract Deliverables  
Incorporated Document 20

| Standard                    | Element                                                                                                              | Y | N |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------|---|---|
| <b>A. Staff Composition</b> | Look at staffing chart for documentation                                                                             |   |   |
|                             | The ratio of participants to direct service staff members should not exceed 10:1                                     |   |   |
|                             | Psychiatrist or Psychiatric APRN @ a minimum of 0.80 (FTE) hours of services for each 100 participants per week      |   |   |
|                             | 1 Administrative Assistant                                                                                           |   |   |
|                             | 1 FTE Team Leader (licensed professional)                                                                            |   |   |
|                             | 2 Nurses – at least one must be an FTE RN                                                                            |   |   |
|                             | 1 FTE Case Manager                                                                                                   |   |   |
|                             | 1 FTE Substance Abuse Specialist                                                                                     |   |   |
|                             | 1 FTE Peer Specialist                                                                                                |   |   |
|                             | 1 FTE Vocational Specialist                                                                                          |   |   |
|                             |                                                                                                                      |   |   |
| <b>B. Key Staff Roles</b>   | Look at position descriptions for documentation                                                                      |   |   |
| 1. Team Leader              | Leads daily organizational team meeting                                                                              |   |   |
|                             | Available to team for clinical supervision                                                                           |   |   |
|                             | Provides 1:1 supervision to staff                                                                                    |   |   |
|                             | Functions as a practicing clinician                                                                                  |   |   |
|                             | Assigns team members including a primary case manager to each new participant                                        |   |   |
| 2. Psychiatrist or APRN     | Conducts psychiatric & health assessments                                                                            |   |   |
|                             | Supervises psychiatric/psychopharmacological treatment of all enrolled participants                                  |   |   |
|                             | Monitors non-psychiatric medical conditions & medications                                                            |   |   |
|                             | Supervises medication management system with nurses                                                                  |   |   |
|                             | Provides brief therapy and diagnostic/medication education to enrolled participants                                  |   |   |
|                             | Provides crisis intervention on-site                                                                                 |   |   |
|                             | Provides family interventions and psychoeducation                                                                    |   |   |
|                             | Attends daily organizational & recovery planning meetings                                                            |   |   |
|                             | Provides clinical supervision to staff including RN and LPNs                                                         |   |   |
|                             | If participant is hospitalized, actively collaborates with inpatient care providers to ensure continuity of care     |   |   |
|                             | If APRN, must have continual access to and weekly consultation with a board-certified Psychiatrist                   |   |   |
| 3. Nurses                   | RN, LPN and MD manage medication system                                                                              |   |   |
|                             | Administer and document medication treatment                                                                         |   |   |
|                             | Screen and monitor for medical problems and side effects                                                             |   |   |
|                             | Coordinate services with other health providers                                                                      |   |   |
|                             | Provide education on health promotion & prevention, education side effects, and strategies for medication compliance |   |   |
| 4. Vocational Specialist    | Serves as mentor to staff for employment assessment and planning                                                     |   |   |
|                             | Maintains liaison with DVR and training agencies                                                                     |   |   |
|                             | Provides full range of work services (job development, assessment, job support, career counseling)                   |   |   |

| Standard                                     | Element                                                                                                             | Y | N |
|----------------------------------------------|---------------------------------------------------------------------------------------------------------------------|---|---|
| 5. Peer Specialist                           | Position is integrated within the team                                                                              |   |   |
|                                              | Shares roles with other team members                                                                                |   |   |
|                                              | Provides individual and group support services                                                                      |   |   |
| 6. Substance Abuse Specialist                | Serves as mentor to staff for assessing, planning and treating substance use                                        |   |   |
|                                              | Provides supportive treatment individually & in groups (i.e., CBT, motivational interviewing, relapse prevention)   |   |   |
|                                              | Completes substance use assessments that consider the relationship between substance use and mental health          |   |   |
|                                              |                                                                                                                     |   |   |
| <b>C. Program Size &amp; Intensity</b>       | Look at policies for documentation                                                                                  |   |   |
|                                              | Participants are contacted face-to-face an average of 3 times per week, based on the participant's individual needs |   |   |
|                                              | Clinically compromised participants are contacted multiple times daily                                              |   |   |
|                                              |                                                                                                                     |   |   |
| <b>D. Admission &amp; Discharge Criteria</b> | Look at policies for documentation                                                                                  |   |   |
|                                              | Admission criteria specify target population                                                                        |   |   |
|                                              | Discharge criteria include demonstrated ability to perform successfully in major role areas over time               |   |   |
|                                              | Discharges mutually determined by participant and team                                                              |   |   |
|                                              | Team assumes long-term treatment orientation                                                                        |   |   |
|                                              |                                                                                                                     |   |   |

**NOTES:**

## **APPENDIX C – ASSERTIVE COMMUNITY TREATMENT TRANSITION READINESS SCALE (ATR)<sup>®</sup>**

Below is a summary for use of the ATR from *The Assertive Community Treatment Transition Readiness Scale<sup>®</sup> User's Manual* by Gary S. Cuddeback, Ph.D.<sup>11</sup>. Dr. Cuddeback gave the Department express written consent for FACT teams to use the ATR.

The ATR is an 18-item measure that covers the following:

- psychiatric and behavioral stability
- hospitalization and incarceration
- housing stability
- treatment engagement
- medication compliance
- independence
- complexity of health and behavioral issues
- intensity of service need
- benefits
- social support
- resources
- insight
- daily structure
- employment.

Each item is scored on a four-point scale: strongly disagree (1), disagree (2), agree (3), strongly agree (4). For example, Item 1 reads, "He/she no longer needs intensive services." If you strongly agree with this statement about the FACT participant, record a score of 4. If you strongly disagree with the statement, indicating the participant still needs intensive services, record a score of 1.

Reverse-scored items: responses to four items must be reverse-scored, so that for each item a higher score indicates greater potential to transition from FACT to less intensive services.

As previously stated, when you complete the ATR, you will be asked to rate each participant on a series of questions using a 4-point scale: strongly disagree (1), disagree (2), agree (3), strongly agree (4). The items that need to be reverse scored are:

- Item 5 – He/she has been in the psychiatric hospital within the last six months.
- Item 7 – He/she has been incarcerated within the last six months.
- Item 12 – He/she has complex needs (i.e., personality disorders, health problems, substance use).
- Item 17 – His/her behaviors have not been stable over the last six months.

---

<sup>11</sup> Cuddeback, G. S., & Wu, J. C. (2021). The Psychometric Properties of the Assertive Community Treatment Transition Readiness Scale (ATR). *Community mental health journal*, 57(7), 1301–1309. <https://doi.org/10.1007/s10597-021-00806-9>

For example, if you respond strongly disagree (1) on item 5, this response should be reverse scored to 4 before computing a Total or Mean score. If you respond strongly agree (4) to Item 12, “He/she has complex needs (i.e., personality disorders, health problems, substance use,” reverse score the item to a 1 before computing a Total or Mean score.

### **ATR Scoring**

Higher scores on the ATR indicate greater potential to transition from FACT to less intensive services.

Either a Total or a Mean score for the ATR can be computed. Total scores are the sum of all item responses on a measure and Mean score are the average of all item responses (**reverse score items 5, 7, 12, and 17 before computing**).

A Total or Mean score on the ATR should not be computed if fewer than 80% of the items are completed. That is, at least 14 of the 18 items must be completed before scoring the ATR.

**Total Scores:** A Total score on the ATR can be computed by adding up all of the item responses. Total scores on the ATR can range from 18 to 72, with higher scores indicating greater potential to transition from FACT to less intensive services (**reverse-score items 5, 7, 12, and 17 first**).

**Mean Scores:** The Mean score on the ATR can be computed by adding up item responses and dividing by the number of completed items. The Mean score can range from 1.0 to 4.0.

To help FACT teams use the ATR to help make decisions about participants who might be ready to transition to less intensive services, cutoff scores were developed. *Cutoff scores should only be used as guides rather than definitive, set-in-stone rules for making transition decisions.*

In this context, participants with Total scores on the ATR equal to or greater than 50 could be considered candidates for transition from FACT to less intensive services. Similarly, participants with Mean scores of equal to or greater than 2.8 could be considered for transition from FACT to less intensive services.

*As stated, these cutoffs are only to be used as a guide.* The ATR should not be the only method used to help make transition decisions. Clinical and professional judgment remain an important part of identifying whether a participant is ready to transition from FACT team services. However, the ATR is used to formalize and codify the transition decision-making process by providing relevant information to consider about transitioning a participant to less intensive services. The intent of the ATR is not to replace clinical and professional judgment but to potentially reduce inherent subjectivity and bias.

This is the **Assertive Community Treatment Transition Readiness Scale® (ATR®)**. Each item is scored on a four-point scale: strongly disagree (1), disagree (2), agree (3), strongly agree (4). For example, Item 1 reads, "He/she no longer needs intensive services." If you strongly agree with this statement, a consumer would receive a score of 4 for this item. Before computing Total or Mean scores, the responses to Items 5, 7, 12, and 17 must be reverse-scored. So, if you respond strongly disagree (1) to Item 5, this response should be reverse-scored to 4 before computing Total or Mean scores. At least 14 of the 18 items must be completed before scoring the ATR®. A Total score can be computed by adding up all item responses. Total scores range from 18 to 72. Mean scores can be computed by adding up all item responses and dividing by the number of completed items. Mean scores range from 1.0 to 4.0. Higher Total and Mean scores indicate greater potential to transition from ACT to less intensive services.

Questions about the ATR® should be addressed to Gary S. Cuddeback, Ph.D., University of North Carolina at Chapel Hill, 325 Pittsboro Street, CB#3550, Chapel Hill, NC, 27599, 919.962.4363, [cuddeback@mail.schsr.unc.edu](mailto:cuddeback@mail.schsr.unc.edu).

|                                                                                             | Strongly Disagree     | Disagree              | Agree                 | Strongly Agree        |
|---------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| 1. He/she no longer needs intensive services.                                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 2. He/she has structure in his/her daily life.                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 3. His/her symptoms have been stable over the last six months.                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 4. He/she has had stable housing over the last several months.                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 5. He/she has been in the psychiatric hospital within the last six months.                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 6. He/she has insight into his/her mental illness.                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 7. He/she has been incarcerated within the last six months.                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 8. He/she has benefits in place.                                                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 9. He/she is engaged in treatment.                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 10. He/she is independent.                                                                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 11. He/she is compliant with his/her medication.                                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 12. He/she has complex needs (i.e., personality disorders, health problems, substance use). | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 13. He/she has adequate resources.                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 14. He/she has social support.                                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 15. He/she is gainfully employed.                                                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 16. He/she keeps appointments without help.                                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 17. His/her behaviors have not been stable over the last six months.                        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 18. He/she has met his/her treatment goals.                                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## APPENDIX D – DEFINITION OF KEY TERMS

**Assertive Community Treatment Transition Readiness Scale (ATR)**<sup>®</sup> is an 18-item measure be used by FACT teams to: 1) identify individuals ready to transition from FACT to less intensive services and/or 2) inform an individual's recovery plan and monitor overall progress. The ATR is used to formalize and codify the transition decision-making process by providing relevant information to consider about transitioning a participant. The intent of the ATR is not to replace clinical and professional judgment but to potentially reduce inherent subjectivity and bias.

**Comprehensive assessment** means an organized process of gathering information to evaluate a person's mental and interactional status and his or her treatment, rehabilitation, and support needs that will enhance recovery. The results of the assessment are used to develop an individual recovery plan for the person.

**Culturally competent services** means acknowledging and incorporating variances in normative acceptable behaviors, beliefs and values in determining an individual's mental wellness/illness and incorporating those variances into assessments and treatment that promotes recovery.

**Empowerment** means the process where the provider of services encourages the individual to make choices in matters affecting their lives and to accept personal responsibility for those choices. The empowerment process will include, but is not limited to: 1) freedom of choice regarding services; 2) influence over the operation and structure of service provision; 3) participation in system-wide human recovery planning; and 4) participation in decision-making at the community level.

**Engage** as it relates to new admissions means the process of identifying, recruiting and considering a person for enrollment in FACT. A person being considered for FACT who is in a state mental health treatment facility, local hospital or crisis stabilization unit (CSU) cannot be enrolled until discharge takes place. Team members will begin to visit the person in the hospital and participate in developing the discharge plan, but will not officially assume responsibility to provide treatment services until the person is discharged. A person already enrolled in a FACT program continues to be enrolled even though hospitalization via a CSU, local hospital or state mental health treatment facility occurs. Even though a person going through the engagement process has not formally been enrolled in a FACT team, the FACT team must keep a written record on:

- Activities that took place during the engagement process,
- The person's response to engagement activities, and
- The name of the FACT staff member conducting the engagement activities.

**Functional Assessment Rating Scale (FARS)** means the rating scale adopted by the Mental Health Program Office that is to be administered consistent with the most current version of the Department's pamphlet 155-2 as it is developed.

**Incompetent to proceed**, pursuant to s. 916.106, F.S., means the condition of a defendant being unable to proceed at any material stage of a criminal proceeding due to mental impairment. Those stages shall include a trial of the case and pretrial hearings involving questions of fact on which the defendant might be expected to testify. It shall also include an entry of a plea, proceedings for violations of probation or violations of community control, sentencing, and hearings on issues regarding a defendant's failure to

comply with court orders. It also considers conditions or other matters in which the mental competence of the defendant is necessary for a just resolution of the issues being considered.

**Initial assessment and recovery plan** means the initial evaluation of a person's mental health status and initial practical resource needs (e.g., housing, finances). The initial recovery plan is completed on the day of admission and guides services until the comprehensive assessment and recovery plan are completed.

**Mental illness** means an impairment of the mental or emotional processes that exercise conscious control of one's actions or of the ability to perceive or understand reality, which impairment substantially interferes with a person's ability to meet the ordinary demands of living. For the purposes of this part, the term does not include a developmental disability as defined in chapter 393, intoxication, or conditions manifested only by antisocial behavior or substance abuse.<sup>12</sup>

**Not guilty by reason of insanity**, pursuant to s. 916.15, F.S., means a ruling by a court acquitting a defendant of criminal charges because of a mental defect sufficient under the law to preclude conviction.

**Psychiatric/social functioning history timeline** means the process that helps to organize, chronicle and evaluate information about significant events in a person's life, experience with mental illness, and treatment history.

**Psychotropic medication** means any drug used to treat, manage, or control psychiatric symptoms or disordered behavior, including but not limited to antipsychotic, antidepressant, mood-stabilizing or anti-anxiety agents.

**Recovery** means a process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential.

**Recovery Plan** means the culmination of a continuing process involving the participant, family or other supports upon consent, and the FACT team. The plan reflects individualized service activity and intensity to meet person-specific needs that promote recovery. The plan documents the person's goals and the services necessary to achieve them. The plan must reflect the individual's preferences for services and choices in the selection of living arrangements. The plan delineates the roles and responsibilities of the FACT team members who will carry out the services.

**Recovery Plan Review** means a written summary describing the person's progress since the last recovery-planning meeting; it outlines interactional strengths and limitations at the time the recovery plan is rewritten.

**Rehabilitation** means services and supports that promote recovery, full community integration and improved quality of life for persons diagnosed with any mental health condition that seriously impairs their ability to lead meaningful lives. Rehabilitation services are collaborative, person directed and individualized. They focus on helping individuals develop skills and access resources needed to increase their capacity to be successful and satisfied in the living, working, learning, and social environments of their choice.<sup>13</sup>
