

SA Aftercare Tool

1. (SA Aftercare) In reference to Eligibility, individual has successfully completed intensive inpatient treatment, residential treatment, day or night treatment with community housing, day or night treatment, intensive outpatient treatment, outpatient treatment, or medication-assisted treatment for opioid addiction.
2. (SA Aftercare) Does the provider specify the type, frequency, and duration of counseling services to be provided to individuals who are eligible for aftercare?
3. (SA Aftercare) Is an aftercare plan developed and does it provide an outline of the goals to be accomplished during aftercare including regular counseling sessions and the need for ancillary services?
4. (SA Aftercare) Is the provider monitoring and documenting progress of individuals involved in aftercare? Is the Aftercare Plan reviewed and updated to determine the need for additional services?
5. (SA Aftercare) Is a written discharge summary completed for individuals who complete services or who leave the provider prior to completion of services? Does it include the basis for the individual's discharge, the individual's progress and setbacks during treatment, and recommendations for further services?
6. (SA Aftercare) Does the chart demonstrate any of the following aftercare activities: supportive counseling, life skills training, or relapse prevention for individuals with mental illness or substance use disorders to assist with ongoing recovery?
